

CRIssoft – 20 years of Romanian thinking programs

1991 - 2011

Guided by the slogan "Programs that think", CRIssoft company is one of the few Romanian private owned companies which has been providing, for 20 years, uninterrupted leading integrated IT solutions and achieved "more than just programming".

Since college time, CRIssoft founder's passion for computing and technology came to life by creating the company in September 1991. His courage to dream and hope and his daring vision that at that time in Romania self enterprises could be successful were the cornerstone of this CRIssoft's beginning.

20 years of existence is much, but at the same time not enough. This is much because the desire still persists to demonstrate that what has been achieved so far can still be improved, but at the same time this is not enough when the target is excellence. CRIssoft is first of all THE IDEA, tightly followed by soul, dedication, willingness, seriousness, competence, professionalism.

Since 1994 the company has begun to develop systems based on Oracle Server and in 1995 became Oracle partner. Thus, CRIssoft was the first Romanian company using computer-aided software engineering (CASE) Oracle Designer/2000 and was as well a pioneer in introducing the Oracle Web / Intranet / Internet technologies.

During the 20 years of successful implementations in various environments and on different business models, CRIssoft proved that its main product, CRIssoft Organization Server™ (CROS™) is an integrated modular system, an open and flexible management tool for the organization. CROS™ provides IT support for sales and logistics, accounting / finance, cost tracking and managing budgets, complete inventory of assets and products, tracking and production planning, human resources, marketing, decision support, leasing activities, information management in activities service, provision of public utilities, customer relationship management.

Efficient, dynamic, flexible, friendly are just some of the attributes can describe the system through which CRIssoft CROS™ confirmed its value over time.

CRIssoft's endeavor to apply the concept "quality at source" and promoting customer-oriented management principles and adaptive company culture, materialized in the ISO 9001:2008 and ISO 14001:2005 certificates.

Customer satisfaction is the mission for CRIssoft and customers have chosen to work with this company as the recognition of 20 years of creativity. CRIssoft team is 100% dedicated to each and every project, maintaining the focus on building long lasting and true relationships with customers and partners.

CRIssoft solutions are used by a wide range of customers from different environments such as distribution, manufacturing, utilities and services. Each of these areas have specific features: billing, bar code identification and specific adaptations such as: interfaces with automated production lines, the centralization of branch data online, interfaces with mobile bar code readers, interface with systems IVR.

These solution supports the daily activity of more than 1500 direct users from various organizations such as ENEL Romania, Romstal Group, Mobexpert Group, Farmexim Group, Radacini Group, Menatwork Group, Apa Nova Ploiesti (group Veolia Eau France), CUP Focsani, Compania Apa Brasov, Apavital Iasi, Unirea Shopping Center, Lemet, Electroalfa and many other companies which are market leaders in their fields.

Christian Gavrila,
General Manager
