# CRISOFT – CHRISTIAN GAVRILA

## OBJECTIVES FOR COOPERATION

The main objective is to offer integrated solutions adapted to the requirements of the clients from different fields of activity. Another CRISOFT objective is to extend its activity and partner network in Central and Eastern Europe.

## MARKETS

- Central and Eastern Europe
- South America
- Asia
- Africa

## AREAS OF SPECIALIZATION

The generated models and the technical architecture of CRISOFT solutions allow parameterisation for the resolution of the general business requirements and adaptation for the specific ones. The CRISOFT solutions are created on the Oracle relational database, in Java and Oracle Developer development environments. They can operate in a client-server or Web architecture.

## AREAS OF APPLICATION

The CRISOFT solutions are used by a large variety of clients from different industries (distribution, production, utilities, services, leasing and insurance, trade). For each of these industries there are specific functionalities (billing, barcode identification) and specific adaptations (automated production line interfaces, branch data centralization, mobile barcode reader interfaces, IVR system interfaces).

## OWN PRODUCTS

The range of CRISOFT products is CROS™ (CRISOFT Organization Server™) – a modular, open and flexible integrated IT system destined for use by the organizations' management:

- CROS ERP (Enterprise Resources Planning) – integrated system destined for the management of companies from different sectors of activity;
- CROS FRC - Supply, Billing and Customer Relations system destined for public utility companies;
- CROS Leasing - Insurance;
- CROS Service;
- CROS Warehouse;
- CROS Barcodes;
- CROS Production planning;
- CROS Supply Chain;
- CROS Web;
- CROS CRM;
- CROS Budget control;
- CROS integration with GIS (Geographic Information System).

## SOFTWARE PROJECTS

One of the most successful projects of the CRISOFT company is the collaboration with Mobexpert in implementing the CROS Warehouse and CROS Logistics Centre applications.

The CRISOFT software solution supports the logistics-warehouse activity through:

- The optimization of the (physical) logistic process of acceptance, storing, handling, shipment and inventory for a volume of at least 1200 pallets daily and a storing surface of 11,889 square meters (warehouse management);
- Logistic order management.

Among other successful projects is the CROS Web application, developed in partnership with Enel and the optimization of the supply of provisions and stock, and a better production management with the CROS Production Planning solution and the CROS Supply Chain, designed in collaboration with Lemet.

## SERVICES OFFERED

CRISOFT Company offers system implementation, analysis and consultancy services for the design of the CROS system interfacing with other systems and consultancy for the restructuring of the organization processes. Moreover, our clients receive technical support and the training required for the CROS system management.

## TECHNICAL EXPERTISE

By using the Oracle Server relational database, the Apache Tomcat application server and Oracle Developer and Java based development, the CRISOFT products have managed to eliminate the constraints of the hard platform.

The general models and the technical architecture of the CRISOFT solutions allow parameterization for the resolution of the general business needs and adaptation for the specific ones (automated production line interfaces, data centralization, interfaces with the mobile barcode readers).

Owing to the Oracle technology, the CRISOFT products have managed to focus on what is important: value added to the daily activity through data collection and the automation of the information flows.

## CERTIFICATION

- Oracle Gold Partner;
- SRAC certification: ISO 9001:2008, ISO 14001:2005;
- ORDA certification;
- Certified OSIM trademarks: "CRISOFT", "CROS", "CRISOFT Organization Server", "Programe care gandesc", "CROS WEB".

## COMPANY PROFILE

**Among the most important suppliers of IT systems dedicated to business management in Romania, CRISOFT remains the most stable company of the IT&C market, with more than 20 years of activity. All this time, it has been one of the top largest software companies in the country.**

**Established in 1991, CRISOFT has gained vast experience in the analysis, design, development and implementation of integrated software solutions. The company's motto, "Software that thinks", has actually managed to advance a new approach in this field.**

**CRISOFT team counts more than 50 employees, external collaborators, subcontractors and partners and it defines itself as a dynamic, experienced and creative one.**

**CRISOFT products and services, but also the constant preoccupation to know the clients' needs, to optimize their business process and even to set new standards in certain industries, have contributed to the maintenance of a vast portfolio of important clients from different fields of activity.**
