**General Manager:** Christian GAVRILA, christian.gavrila@crisoft.ro

**Established in:** 1991 **Employees (Software/Others):** 33/9  
**Software Revenue:** 1.99 M EUR in 2013 **Software Exports:** 0.52 M EUR in 2013

### COMPANY PROFILE

Among the most important suppliers of IT systems dedicated to business management in Romania, CRISOFT remains the most stable company of the IT&C market, with more than 20 years of activity. All this time, it has been one of the top largest software companies in the country.

The experience included in the CRISOFT Organization Server – CROS, together with the software technology and the implementation methodology secure maximum cost-performance efficiency through the combination of a ready-to-use solution and the flexibility of a solution developed internally or 100% upon demand.

### OBJECTIVES FOR COOPERATION

The main objective is to offer integrated solutions adapted to the requirements of the clients from different fields of activity. Another CRISOFT objective is to extend its activity and partner network in the Central and Eastern Europe.

### MARKETS

Central and Eastern Europe  
 South America  
 Asia  
 Africa

### SOFTWARE PROJECTS

One of the most successful projects of the CRISOFT company is the collaboration with Mobexpert in implementing the CROS Warehouse and CROS Logistics Centre applications. Among other successful projects is the CROS Web application, developed in partnership with Enel or the CROS Production Planning and the CROS Supply Chain solutions, designed in collaboration with Lemet.

### SERVICES OFFERED

CRISOFT Company offers implementation, analysis and consultancy services for the design of the CROS system interfacing with other systems and consultancy for the restructuring of the organization processes. Moreover, our clients receive technical support and the training required for the CROS system management.

### TECHNICAL EXPERTISE

By using the Oracle Server relational database, the Apache Tomcat application server and Oracle Developer and Java based development, the CRISOFT products have managed to get rid of the constraints of the hard platform.

The general models and the technical architecture of the CRISOFT solutions allow parameterization for the resolution of the general business needs and adaptation for the specific ones (automated production line interfaces, data centralization, interfaces with the mobile barcode readers).

The CRISOFT solutions are created on the Oracle relational database, in Java and Oracle Developer development environments. They can operate in a client-server or Web architecture.

Owing to the Oracle technology, the CRISOFT products have managed to focus on what is important: value added to the daily activity through data collection and the automation of the information flows.

### CLIENT REFERENCES

CRISOFT products and services have contributed to the maintenance of a vast portfolio of important clients from different fields of activity. Among those clients are: Enel, Electroalfa, Apa Nova Ploiesti, Compania de Apa Brasov, Mobexpert, Lemet, Romstal, Valrom, Farmexim, HelpNet, Radacini, Autoklass.

### CERTIFICATION

Oracle Gold Partner  
 SRAC certification: ISO 9001:2008, ISO 14001:2005  
 ORDA certification

## CRIssoft

**Software Revenue:** 1.99 M EUR in 2013 **Software Exports:** 0.52 M EUR in 2013

### COMPANY PROFILE

As main instruments for management, CRIssoft solutions and their implementation in modern organizations are a mix of experienced business analysts, deployment consultants and top information technologies.

The general patterns and technical architecture of CRIssoft solutions allow parameterization for solving general business requirements and adjustments for the specific issues. CRIssoft solutions are used by a wide range of customers in various fields of activity, with specific functionalities and adjustments available for each area.

### PRODUCTS DESCRIPTION

#### CROS ERP

CROS ERP is a complex application that provides integrated information support for all existing processes in an organization: financial - accounting, fixed assets, supply - logistics - sales, manufacturing, maintenance and repair, human resources and payroll, etc.

For more than 20 years, since the application has been launched, CRIssoft has developed many modules, by means of which the program is adjusted to the activity or area in which the customer activates, depending on the organization's needs.

#### CROS FRC

CROS FRC provides informational support mainly for distribution organizations with various areas of activity: electrical energy, water, gas or other product-services whose invoice is calculated on the basis of a regular consumption. One of the main benefits of these applications is the interface with the web and mobile platforms with the aim of sustaining B2C relationships.

CROS FRC is a complete and easy-to-use solution for achieving the organization objectives by: increasing availability and quality of information due to the integrated structure system, increasing compliance degree of the working procedures, increasing efficiency by a better organization of activities within the business.

#### CROS CLOUD COMPANIES (3C)

The purpose of this application is to provide customers with a tool, which ensures data uniformity on legal persons in Romania and increases data quality, in accordance with the Ministry of Finance and the National Trade Register Office.

With the help of CROS Cloud Companies, clients have integrated access to specific financial or identification data of third parties. Also, they have the option of verifying the tax vector, offers can be issued depending on geographical areas, objects of activity, financial indicators etc., and they can reduce operation times regarding the identification data of third parties.
