 Software Exports: 0.6 M EUR in 2015

Among the most important suppliers of IT systems dedicated to business management in Romania, CRIssoft remains the most stable company of the IT&C market, with more than 25 years of activity. All this time, it has been one of the top largest software companies in the country.

The experience included in the CRIssoft Organization Server – CROS, together with the software technology and the implementation methodology secure maximum cost-performance efficiency through: the combination of a ready-to-use solution and the flexibility of a solution developed internally or 100% upon demand; the adaptation of the general model by implementing the organization's specificity; the reduction of the costs related to the design, maintenance and pace-keeping with the technological evolution of a ready-to-use system or switch-on system.
